

NEW START - SMG 50

Dear friends of the blue ocean and of the SMG designs!

It's been a while since we published our last News.

Lots of changes have been done and now we can report on the refreshed SMG 50 design and new opportunities.

To design an innovative catamaran, to realize a revolutionary concept, and to sell the result is possible. This Gerhard Schein has proven over the last couple of years. The SMG 50 easy-to-use concept is still regularly gaining new admirers just by having the latest finished SMG 50 "Ayoba" in Langebaan/South Africa.

To finance once-off production, control South African labour, and permanently invest time and money in marketing is a different story. That's why the SMG team of 3 has decided to stop the production, and has closed the factory in Cape Town. Now Gerhard Schein can focus again on his very special talent with creative passion: to combine SAFETY, SPEED & COMFORT in an appealing modern sailing catamaran concept.

The SMG 50 "EVolution" will keep all proven features.

- Amazing sailing performance enabled via the combination of ULDP hulls (ul-

FACTS AND FIGURES

- Design development of the SMG 50 EVO catamaran
- "Ayoba" finished and available
- Business opportunity for investors

- tra low draft performance), weight considered production and A-mast high safety and easy-to-use sailing characteristics through the logic of the A-frame-rig,
- all-around visibility and ergonomically sail handling in the centre cockpit.

To underline the simplicity of the concept the SMG 50 EVO has standard

- diesel sail drive engines for easy-to-use motor drive.

The change on the SMG 50 design is mainly based upon:

- more edged shapes on the deck
- additional comfort space inside.

The diesel-electric hybrid would still be the ideal propulsion for an innovative catamaran concept. It just takes lots of persistence, money and effort to get it consumer friendly. Should you be interested in a second hand SMG 50 with well working hybrid propulsion, please contact Richard Malits: malits@rmdata.at Blog: <http://do-re-mi-2010.blogspot.com> For interested investors, who believe devoutly in the innovative SMG sailing catamaran, there is also a possibility to buy the SMG 50 "EVolution" catamaran concept. It includes all SMG 50 moulds, plans and drawings, CE certification, plus personal production consultation by Gerhard Schein.

For interested new sailing catamaran buyers, we can offer to supervise a one-off production done by an established boat building Company in Cape Town under European management. Should you be interested, please send us your request.

In Cape Town recently finished and launched SMG 50 named "Ayoba" has already

some of the extras of the new design. This catamaran was finished for a Dutch investor and is equipped with 2 Yanmar diesel engines, targa wing with mesh seating bench, a solid aft deck roof with integrated LED lights, and a comfortable navigation lounge. The owner is very happy with his SMG 50 and knows that the innovative SMG features are making "Ayoba" the easiest-to-use sailing catamaran in this size in the market. And as investors are always open minded: If the price is right, "Ayoba" is also available for sale. Specification and price list on request.

In this spirit, we are wishing the SMG 50 EVO a good start!

Best regards from Cape Town
p.p. Nina Schein
